### “DID YOU KNOW”

#### As Seasons Change our Skin Changes

We change the oil in our cars after so many kilometres. Our skin is very similar after using the same product for a period of time the skin plateaus and no longer responds like it did when we first started using the product. Fall and springtime of the year is huge factor for skin changes due to environmental, foods available freshness, furnaces, car heaters and so on. Regular clients should be booking appointment for skin consultations to ensure your skin is well prepared for the season. Do not wait until you loose that instant radiance. Take action and provide the skin with immediate and long-term hydration.
